

Concern for the environment has led the international community to develop three historic agreements: the Paris Agreement, the 2030 Agenda for Sustainable Development, and the UN Declaration “Towards a Pollution-Free Planet”.

**INTERNACIONAL HISPACOLD** remains committed to protecting the environment to combat climate change and protect biodiversity, about all the company’s business areas, activities and employees; and to promoting sustainable development and the circular economy. By means of this Environmental Policy, the company is setting out the guidelines and general objectives that guide its management activities; to which end, in 2007 it certified its Environmental Management System in accordance with the ISO 14001 standard, regarding the following activities:

**The design, manufacture, assembly and after-sales service of climate-control equipment for passenger transport.**

The guidelines are as follows:

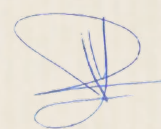

To meet all the requirements of HISPACOLD’s clients while ensuring continuous compliance with all the legal and regulatory stipulations at the local, regional, national and European levels; and to fulfill all of the commitments that the company has entered into in terms of the environmental impacts of its activities.

-  To ensure that all its activities, products and services are provided within the framework of this policy and in compliance with the applicable environmental legislation and regulations.
-  To eliminate—or at least minimize—the harmful environmental impacts of its activities, products and services, and promote an eco-design approach when developing new ones.
-  Through eco-design, to move towards more sustainable products and achieve the objective of a circular economy, with the aim of optimizing the use of natural resources by promoting reuse and recycling.
-  To increase the company’s awareness of its environmental impacts, as a means of preventing or minimizing these impacts.
-  To set and review, on a regular basis, environmental goals and targets that are designed to implement the provisions of this policy within a framework of continuous improvement.
-  To communicate this policy to everyone who works for or on behalf of HISPACOLD, including contractors and suppliers, to ensure they are committed to protecting the environment, preventing pollution, using resources sustainably, mitigating climate change, and protecting ecosystems and biodiversity.

To ensure that the company’s policies are circulating correctly, and are permanently available so that they can be reviewed by the relevant parties, the following resources are provided:

-  Displays on the noticeboards that can be found in various locations throughout the company’s premises.
-  Direct communication with employees: talks, meetings, etc.
-  Company website.

The aims of this Environmental Policy will be reviewed annually as part of the Management Review. These aims are condensed and articulated in the form of specific targets, which are regularly evaluated and approved by the management.
